9 MARCH 2019

**SHAPING THE FUTURE OF
WORK**

The effects of Digitalisation and Artificial Intelligence

1. Digitalisation and Artificial Intelligence already affect us all.
 - a) In what ways?
 - b) What are their positive and negative aspects?

2. Some people may lose their jobs as a result of the digital economy, whilst others are working in 'precarious' situations (i.e.without contracts, pension rights, statutory parental leave and sickness benefits).

As Christians we are called to care for others.

How can we and our churches help those working in situations of this kind?
